Manuel Barra Lazo

Full Stack Developer · Next.js, React & TypeScript

Barcelona, Spain · +34 634 008 260 · manuelbarralazo@gmail.com · malb.dev · linkedin.com/in/manuelbarra · github.com/ManuelBarra

SUMMARY

Full stack developer with 5+ years building web products with React, Next.js and TypeScript, from enterprise portals for CaixaBank, Roca and Repsol to in-house platforms powered by generative AI. At Genomcore I migrated two corporate sites to Next.js, scoring 100 in every Lighthouse category, and rolled out a catalogue of AI skills for marketing. I now build web and cross-platform products at SADATA while studying for a Higher Diploma in Cross-Platform App Development (Java, Kotlin, Android).

EXPERIENCE

SADATA · Cross-Platform Developer (Full Stack) — Remote · Jun 2026 – Present

BI, AI and custom software consultancy based in Barcelona and Santiago de Chile, with clients in 5 countries.

- **Hip Hop 4 Life** (in-house product, pre-launch): full stack EdTech platform on Next.js 16, React 19, TypeScript, Prisma/PostgreSQL, Auth.js and Stripe: 134 lessons across 6 disciplines, XP progression and 55 API endpoints.
- Integrated the Claude API (Anthropic SDK) into a per-bar syllable and rhyme analyser and into automated practice feedback, with rate limiting and input sanitisation.
- **BDI** (multi-tenant email marketing platform, UK, Jun–Aug 2026): wrote the PRD for "Source Contacts" and built its React frontend in a MERN team: prospect search over the Wiza API, asynchronous enrichment and GDPR compliance.

Stack: TypeScript, Next.js, React, Node.js, Prisma, PostgreSQL, Anthropic SDK, Stripe, Jest, Vercel

Genomcore · Frontend Developer · Applied AI — Barcelona · Jan 2025 – Jul 2026

Healthtech company with 10+ years managing clinical and genomic data for hospitals and health services.

- Led the migration of **genomcore.com** and **madeofgenes.ai** from WordPress to Next.js with static Markdown content: **100 in all four Lighthouse categories** (performance, accessibility, best practices and SEO).
- Redesigned both sites with a designer, including the company's 10th-anniversary website.
- Built a **catalogue of generative AI skills** for the 7-person marketing team, published through an internal marketplace.
- Adopted Claude Code for AI-assisted development to speed up the legacy code migration.

Stack: Next.js, React, TypeScript, WordPress, Markdown, Claude Code, Gemini, Git

DigitalMakers (Vass) · Frontend Developer — Barcelona · Apr 2022 – Jun 2024

- Built the **AgroBank Hub** (CaixaBank) frontend end to end: events calendar, innovation cases, filterable categories, store and sector reports, all fed by REST APIs.
- Developed and maintained **CaixaBank**'s corporate portals (Talks, Private Banking, Premier Banking and Wealth Management Luxembourg) and their versions in 6 countries.
- Frontend for **Roca.es** and **Guía Repsol**: responsive layout, components and production incidents.

Stack: JavaScript, Liferay, AEM, jQuery, SASS, Bootstrap, REST APIs, Figma, Jira, Scrum

Career break (travel), Jul – Dec 2024.

inMotion Real Estate Media · Frontend Developer (US clients) — Barcelona · Nov 2021 – Apr 2022

- Built **The Abbey Company** end to end: Vue.js property search with combinable filters and map, grid and list views, a vacancies module and a stats dashboard.
- Custom WordPress themes and Custom Post Types for The Multifamily Firm and H&R Retail (US real estate).

Clos del Portal · Vins Nus · Alfredo Arribas · Freelance Web Developer — Remote, part-time · Sep 2020 – Present

- Technical owner since 2020 of a Priorat winery group's multilingual websites and online store (hosting, security and SEO); migrating all three sites from WordPress to Next.js with SSG.
