Manuel Barra Lazo

Full Stack Developer · Next.js, React & TypeScript

Barcelona, Spain · +34 634 008 260 · manuelbarralazo@gmail.com · malb.dev · linkedin.com/in/manuelbarra · github.com/ManuelBarra

SUMMARY

I've been building web products with React and Next.js for over five years. I started in consulting, working on projects for CaixaBank, Roca and Repsol, then moved to Genomcore, a healthtech company, where I took their two websites from WordPress to Next.js and brought AI into the marketing team's daily work. I'm now a full stack developer at SADATA, and I'm also studying cross-platform development to add Java, Kotlin and Android.

EXPERIENCE

SADATA · Cross-Platform Developer (Full Stack) — Remote · Jun 2026 – Present

BI, AI and custom software consultancy with a team in Barcelona and Santiago de Chile and clients in 5 countries.

- I'm finishing **Hip Hop 4 Life**, our learning platform for hip hop culture: 134 lessons across 6 disciplines, level-based progression and Stripe subscriptions. Built with Next.js 16, TypeScript, Prisma and PostgreSQL.
- Added AI with the Claude API: it analyses the rhythm and rhymes of each verse and gives students feedback, with usage limits to prevent abuse.
- For **BDI**, a UK email marketing platform, I wrote the product spec for "Source Contacts" and built its React frontend (Jun–Aug 2026).

Stack: TypeScript, Next.js, React, Node.js, Prisma, PostgreSQL, Anthropic SDK, Stripe, Jest, Vercel

Genomcore · Frontend Developer · Applied AI — Barcelona · Jan 2025 – Aug 2026

Healthtech company with 10+ years working with clinical and genomic data for hospitals and health services.

- Moved **genomcore.com** and **madeofgenes.ai** from WordPress to Next.js. Both sites score **100 in all four Lighthouse categories**.
- Redesigned both with a designer, including the company's 10th-anniversary website.
- Built a **set of AI skills** for the 7-person marketing team that saves them around **10 hours a week**.
- Used Claude Code to speed up the migration of the old codebase.

Stack: Next.js, React, TypeScript, WordPress, Markdown, Claude Code, Gemini, Git

DigitalMakers (Vass) · Frontend Developer — Barcelona · Apr 2022 – Jun 2024

- Owned the whole **AgroBank Hub** (CaixaBank) frontend: events calendar, innovation cases, store and reports, all connected to REST APIs.
- Built and maintained **CaixaBank**'s corporate portals (Talks, Private Banking, Premier Banking and Wealth Management) and their versions in 6 countries.
- Worked on the **Roca.es** and **Guía Repsol** frontends, from layout to production fixes.

Stack: JavaScript, Liferay, AEM, jQuery, SASS, Bootstrap, REST APIs, Figma, Jira, Scrum

Career break to travel, Jul – Dec 2024.

inMotion Real Estate Media · Frontend Developer (US clients) — Barcelona · Nov 2021 – Apr 2022

- Built the whole **The Abbey Company** website, including a Vue.js property search (filters, map, grid and list views), job listings and stats.
- Made custom WordPress themes for The Multifamily Firm and H&R Retail, two US real estate firms.

Clos del Portal · Vins Nus · Alfredo Arribas · Freelance Web Developer — Remote, part-time · Sep 2020 – Present

- Since 2020 I've looked after the websites and online store of a Priorat winery group (hosting, security and SEO), and I'm now moving them from WordPress to Next.js.

EDUCATION
